Bahir Dar University

2022 – 2026

PROJECTS

Project Management System

Sole Developer

This project management system supports adding projects, breaking them into tasks, assigning tasks to team members with email notifications, and tracking progress and deadlines. To test as a project manager you can use these credential.

Gbi Gubae Family Distributed System

Sole Developer

This application is designed for Gibi Gubaea and is used exclusively by admin and super admin users. Its primary function is to manage the distribution of Gbi Gubae members into families. The distribution can be done automatically by the system or manually by an admin.

Record Patient Data and Download It as an Excel File

Sole Developer

This web application is designed for doctors to efficiently record patient data in real-time during treatment. Should a doctor need to generate a report on the number and details of patients treated within a month, the application allows them to download the recorded patient data as an Excel file for submission to their supervisor.

Restaurant Management System

Sole Developer

Restaurant management system for managing orders, inventory, reservations, and menu items. It has features like order processing, table management, inventory tracking, and reporting.

Event Registration System

Sole Developer

Event registration system where users can register for events, view event details, and manage their registrations.

Job Board Platform

Sole Developer

Job Board Platform where employers can post job listings and job seekers can search and apply for jobs. It has features like job listings, candidate profiles, resume uploads, and job application tracking.

All the above project is Only Backend except Record Patient Data and Download as Excel file.
